

FIXED COOLING CONVENTIONAL SPLIT SYSTEMS

TURBO POWER

The Turbo Power Function allows you to have the cooling and heating you desire in the shortest possible time.

QUIET OPERATION

Design and technology improvements make De'Longhi air conditioners one of the quietest units in its category.

ELECTRONIC TIMER

De'Longhi models have integrated timers. This enables the unit to switch on while you are out, making your home comfortable for when you get home.

ENERGY SAVING

Reverse cycle air conditioning is the most effective way to cool or warm your home, instead of relying on energy to heat an element, air conditioners work on the change of state of the refrigerant gas to provide the heating and cooling. This results in approximately 3 times the heating or cooling energy output compared to the energy input to the unit.

De'Longhi FIXED COOLING

DEFS71AUP CONVENTIONAL SPLIT SYSTEM

FEATURES

- **BIOSILVER TECHSYSTEM:** High performance air-purifier with electrostatic filter, antibacterial silver ion filter and ionizer
- **ECC Technology (Electronic Climate Control)** with Large LED display for ease of use
- **Turbo Power Function:** Creates the most comfortable conditions in the shortest possible time
- **I-COMFORT:** Thanks to the temperature sensor fitted in the remote control the desired climate can be set by the location of the remote control
- **Smart Mode:** All models are fitted with electronic controls that, when selected, will automatically choose the right mode of operation, capacity and temperature to achieve a consistently high level of user comfort
- **Sleep Function:** The micro processor controls the operation at minimum noise, while the thermostat carefully controls the temperature in the room
- Wide display LCD remote control
- Digital timer and thermostat
- 4 Star Energy Rating (cooling)
- 3 ½ Star Energy Rating (heating)
- 5 year full warranty
- Cooling Capacity: 6,200 W (21,142 Btu/h)
- Heating Capacity: 7,000 W (23,870 Btu/h)
- Cooling Energy Efficiency Rating: 3.1

CONVENTIONAL SPLIT SYSTEMS

DEFS58AUP CONVENTIONAL SPLIT SYSTEM

FEATURES

- **BIOSILVER TECHSYSTEM:** High performance air-purifier with electrostatic filter, antibacterial silver ion filter and ionizer
- ECC Technology (Electronic Climate Control) with Large LED display for ease of use
- **Turbo Power Function:** Creates the most comfortable conditions in the shortest possible time
- **I-COMFORT:** Thanks to the temperature sensor fitted in the remote control the desired climate can be set by the location of the remote control
- **Smart Mode:** All models are fitted with electronic controls that, when selected, will automatically choose the right mode of operation, capacity and temperature to achieve a consistently high level of user comfort
- **Sleep Function:** The micro processor controls the operation at minimum noise, while the thermostat carefully controls the temperature in the room
- Wide display LCD remote control
- Digital timer and thermostat
- 4 ½ Star Energy Rating (cooling)
- 4 Star Energy Rating (heating)
- 5 year full warranty
- Cooling Capacity: 5,600 W (19,096 Btu/h)
- Heating Capacity: 5,900 W (20,119 Btu/h)
- Cooling Energy Efficiency Rating: 3.11
